User Stories

1) As a user I want to get an overview of the availibility of the rresources, so I can book a resource

2) As a user I want to decide on the time frame of the resource which is booked, so that no other user can book the resource on the same time

3) As a user I want to decide if the booking is an single event or recurring, so that I don't have to book the same resource each time

4) As a user I want to see my reservations, so I can cancel reservations

use case diagram

user logs in ->

user sees overview of resource ->

user licks on a resource ->

user sees on which dates an time frames a resource is booked or available ->

user decides the time frame of a reservation ->

user can decide if the reservation is recurring or not ->

if the reservation is recurring, user decides, if the reservation is recurring weekly or monthly ->

user decides until which date the reservation is recurring.
